TENDER NOTICE No. UGVCL/RO/R & D/iNTENT/

9	Provision for separate display of KWH and separate scrolling parameters in energy meters. a. Static Energy meters are used for recording various billing parameters. b. The meter displays various quantities like KWH of all the TODs, total export import quantities, MD in KW and KVA, Voltage and current of all the three phases etc. in scrolling mode. It takes longer time duration to complete one cycle. Which may mislead the meter readers as well as takes more time in meter reading c. Our most of the consumers are being billed on only KWH billing quantity. d. We now intent to have an additional display window for continues displaying cumulative KWH in single phase meters and displaying KWH, RKVAH lag and Billing MD in three phase meters. e. Or in the same display window, there should be two parts, in upper part of the window, continues display of above quantities and in lower part other scrolling parameters shall be shown as usual. f. We also intent to have a programmable alternative to show the cumulative billing quantities of last reset. We may opt any of the options. g. Size of letters should be legible with LCD display of Green/Yellow colour.
